 Monday to Friday from 8am to 8pm  
 Sunday from 10am to 2pm

Routine      Gender :  M  F      Collection date : \_\_\_\_\_ YYYY – MMM – DD      ID # : \_\_\_\_\_  
 Last name : \_\_\_\_\_ First name : \_\_\_\_\_  
 Birth date : \_\_\_\_\_ YYYY – MMM – DD      Medicare # : \_\_\_\_\_ Telephone : \_\_\_\_\_  
 Amount paid : \_\_\_\_\_ \$      Approved by : \_\_\_\_\_  Cash  Cheque  Interac  VISA  MC  AMEX

**PATHOLOGY REQUISITION**

**REQUESTED TEST(S)**

**Gynecology**

- Liquid cytology ThinPrep™ (PAPT)
- HPV screening (high risk) (HPV)
- Pap test (conventional) (PAPS)
- Reflex testing (TPPV)
- (HPV screening performed if ThinPrep™ ASC, NOS)*
- HPV genotyping (HPV identification) (GENHPV)

**Urology**

- Urine cytology (UCYT)
- 1 of 3     2 of 3     3 of 3
- Immunocyt™ (ICYT)

**CLINICAL INFORMATION**

**Gynecology**

- LMP \_\_\_\_\_
- Pregnant
- IUD
- Oral contraception
- Other \_\_\_\_\_
- Gravida : \_\_\_\_\_
- Para : \_\_\_\_\_
- Post-partum : \_\_\_\_\_
- Hysterectomy, total
- Hysterectomy, partial
- Chemotherapy
- Radiotherapy
- Amenorrhea
- Hx of condyloma
- Menopause
- Hormonotherapy
- PM bleeding
- Hx abnormal Pap test

**Urology**

- Hx d'hematuria
- Cystoscopy
- Previous abnormal cytology
- Other \_\_\_\_\_

**SOURCE OF SAMPLE**

**Gynecology**

- Cervix
- Cervix – Endocervix
- Vulva
- Endometrium
- Vagina
- Other \_\_\_\_\_

**Urology**

- Spontaneous voided miction
- Catheter
- Bladder
- Ureter
- Other \_\_\_\_\_

**DESCRIPTIVE DIAGNOSIS - FOR LABORATORY USE ONLY**

**Gynecology**

- Unsatisfactory sample
  - Inflammation     Blood     Acellular     Hypocellular
- Negative ① for intraepithelial and invasive lesions
- Candida       No transformation zone component       Scanty epithelium
- Inflammation     Squamous metaplasia       Reactive
- Atypical squamous cells of undetermined significance (ASC-US).
- Atypical squamous cells, rule out HSIL (ASC-H)
- Atypical glandular cells
  - Not otherwise specified     Endocervical     Endometrial
- AIS
- Intraepithelial lesions
  - Low grade     High grade
- Invasive lesions
  - Squamous     Endocervical     Endometrial
- Other : \_\_\_\_\_

**Urology**

- Unsatisfactory sample
- Negative
- Benign cellular changes
- Crystals
- Equivocal for neoplasia
- Low grade papillary
- High grade transitional
- Adenocarcinoma
- Autre : \_\_\_\_\_

Was the slide staining satisfactory for evaluation?  Yes  No

① Includes atypia of repair squamous, glandular or specific micro-organisms i.e. candida, trichomonas, bacterial vaginosis, herpes simplex, actinomyces.

**FOR DOCTOR ONLY**

Signature : \_\_\_\_\_ # Licence : \_\_\_\_\_ Date : \_\_\_\_\_

The Pap Test is a screening test for cervical cancer and it's precursors with an inherent false-negative rate. Liquid based cytology with HPV testing is the best approach to screen for cervical cancer. HPV alone can lead to false negatives due to the methodological restrictions on assessing the adequacy of the procured sample.

**FOR PATIENT ONLY**

I hereby authorize a nurse, doctor, medical technologist or other qualified individual to follow up on any abnormal Pap test result in order to ensure that the appropriate actions are taken.

I understand and accept that the results of this follow up will be released solely to the physician whose name and address appears on the requisition.

Only CDL Laboratories Inc. will retain this information in any type of file, archive or data bank as required by law.

I understand that without my consent through my signature on this form the required follow up will not be performed..

**FOR CYTOTECHNOLOGIST & CYTOPATHOLOGIST**

**CERVICAL CYTOLOGY RECOMMANDATIONS**

- Repeat Pap test with or without HPV test
  - 3 to 6 months
  - 1 year
  - 1 to 3 years
- Repeat Pap test with or without HPV test after treatment
  - Vaginal oestrogen
  - Therapy for specific infection
- HPV screening
- Colposcopy
- Endometrial biopsy
- Other \_\_\_\_\_

**URINE CYTOLOGY RECOMMANDATIONS**

- Repeat urine cytology (voided)
- Repeat Immunocyt™
