Objet / Subject : Instrumentation update: Hemostasis
Date: October 17th 2012

Dear Client,

CDL Laboratories is proud to announce that we have installed the new automated instrument for Hemostasis analysis.

Please be advised that due to the instrumentation and reagent changes, INR results could appear lower compared to previous patient results.

The CDL Codes and testing costs for Prothrobine Time (PT) and Activated Partial Thromboplastin Time (PTT) remain unchanged.

For any questions, please do not hesitate to contact the laboratory (514) 344-8022 ext 223.

The Laboratory.
